

Comments and Recommendations

Covert Training

(Operations School)

Comments:

1. In the proposed OTR reorganization, this element, formerly the Project Training Division, retains the same functional responsibilities and operating characteristics as before. It is proposed for incorporation into the Operations School complex to attain complete coordination among those OTR elements conducting training in subjects related to clandestine services and activities.
2. The proposed T/O for this element is slightly increased because of its workload. The nature of the mission requires an individual handling of the trainees in this element. Formalized or group training is not possible or feasible.
3. Except for the realignment in the command structure, no change is envisioned in the operation of this element.

Recommendations: None.
